

React Gaming

Purpose - To match gamers with games

- To keep gamers informed on upcoming and new releases
- Find games based on user activity to serve them information on games they may be interested in

Features and Functionality

- The site is powered by Rawg's api
- React gaming requests Rawg's data and return the data for the user to view
- User's can select games they own and the site will recommend games based on this information
- User data such as username, email, password and interests
- Calendar that will show the user upcoming games that may interest them

The image features the RAWG logo in large, white, bold, sans-serif capital letters. To the right of the logo is a collage of various video game scenes, including characters in action, landscapes, and abstract art. The background of the entire slide is a dark, textured grey.

RAWG

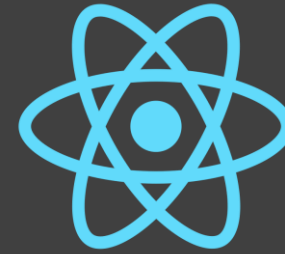

RAWG is a video game discovery site.
We are building the most comprehensive
database that is powered by personal
player experiences.

Target Audience

- Gamers of all ages and platforms
- Customers looking for potential title recommendations

MVP

As a user I want to be able to save a list of games that I like (or that I own) so that I can better find games to suit me.

22 Jul

As a user I want to be told about games that I would probably like, so that I can stay up-to-date and entertained.

23 Jul

As a user I want to be able to search through a library of games for new games I haven't heard of so I can find new games I might like.

23 Jul

As a user I want to be told about games coming out soon that I may like so that I can get excited about them.

26 Jul

As a user I want to see statistics and detailed information about any game so that I can make an educated purchase.

23 Jul

As a user I want to sign up with my email address so that I can have a
